## To the Friendly Reader.

Gentlemen,

I Have now finished my *Opus Reformatum*, which is now Printing; and in it I have shewed the Groundless and Idle Practices of the Common Astrologers, in their managing Nativities, &c. and this occasionally done in examining the Figure that is Printed and called, O. Cromwel's Nativity, with some Remarks on that Treatise, printed by the same Author, and called *Cardines Coeli*. And I shall shortly also present you with my *Defectio Geniturarum*, where you may find full and ample Satisfaction about the present Astrological Hypothesis, cried up by the whole Tribe.

I did last year tell you, that I would Print nothing by the Name of a Prophecy, nor in a Single Sheet; and I do here tell you also, That if any such thing is done, it is a Cheat upon you, and an Abuse upon me, and not mine, as they pretend.

The Verses at the head of the Right-hand Page, are J. G. his Verses about the Prince of Wales, Anno 1689. travestied. He printed them in his Almanack in praise of his Master; and I here in praise of the Author, a very good Protestant, only he used to forget the Gunpowder-Treason-day every year in his Almanack. — Ad John!

The Ephemerides is not taken from Gadbury or Merifield, but from Mezzavacca, and do believe that they come as near the mark as Street doth, as I have often compared them with Calculation.

I being furnished with better Medicines than the Common Practitioners are, do resolve to employ them in a publick Practice of Physick, for the publick Good and Advantage of my Countrey; and therefore in any Case of Sickness Distemper, or Weakness of the Body, I shall be ready to do what Service I can in order to their Recovery, and this with as little Charge as may be; and to the utmost of his Power you may depend on

From Henrietta-Street, next  
door to the Boars Head in  
Covent-Garden, London.

Your Friend and Servant,

John Partridge.

We've liv'd to see (thank Heaven's awful Name)

Our Courts of Justice in good Hands again.

Our Laws are good, so are our Judges; hence,

No murd'ring Judgments now you hear from thence.

Tories and Traitors treated (all Men knows)

Like Lambs and harmless Subjects, not as those.

No Whipping Judges, nor their bloody Cause,

Whose Rules Court Precepts were, not English Laws.

No mighty Mouth, who in his staring Shapes

Sat in those Courts surrounded by his Apes.

No murd'ring B—n's, Gra—m's, Hell's curf'd Brood,

Their hearts for Rome, their hands for Bribes and Blood.

## The Introduction.

**A**N Ancient *Hermit* by a craggy Hill,  
 By Nature's help, and art, had form'd a Cell,  
 Where he did live from Rage and Madness free,  
 And did observe that curse, *Mans Luxury*:  
 He spent his days in Peace, content, and Ease,  
 And long before foresaw poor *Englands* case.  
 He smil'd to see *French Apes* fill *Albions Hall*,  
 And make the *Englisk Lyon* their *Jack-call*.  
 And how the *Gallick Circe* did prevail,  
 How well she *bow'd*, and *cring'd*, and *wag'd* her Tail.  
 How sure she dealt, how Rich by a light gain,  
 How well she *rid us*, and *was rid* again.  
 He laught to see *Towns sold*, and *Faith betray'd*;  
*Honesty sneak*, *Hypocrisy* obey'd.  
 To see the great Ones how their manner was,  
 Roar against *Rome*, and yet they went to Mass.  
 But griev'd to see how our Religion stood;  
 And Faiths pretence by *Knaves* was *built in Blood*.  
 How they proceeded, how they laid their Crimes  
 To *Excommunications*, *Fails*, and *Fines*;  
 From such a Faith, and Men, Lord set us free,  
 Whose Doctrine gives a *murd'ring Destiny*!  
 He piti'd *England's* fate, how tamely she  
 Parted with *Charters*, *Laws*, and *Liberty*.  
 Observ'd their *Passive Cant*, their Noise, and Tools,  
 How with Church-notions they betray'd the Fools.  
 He wept to see the *murd'ring Trade* and *Crew*;  
*Sheriffs* made, and *Juries* packt, they knew would do:  
 Crimes form'd and forg'd, and when they wanted more,  
 A *swinging swearing Tool* they had in store;  
 Or else some *Inuendo*, then in force,  
 By which those *Judges* with their Wife discourse;  
 If *Brick-bat* was but nam'd, 'twas prov'd a *Horse*.  
 Thus *Whip* and *Halter* mov'd, as *George* gave *Laws*,  
 That *Butcher-General* to the *Popish Cause*.  
 Imagin'd Crimes, *Crimes* that were never done,  
 Let *Collonel Sydney's Murder* stand for one,  
 Where *Inuendo* did the Work alone.  
 By these, and such like means was all destroy'd;  
 By these *base Actions*, and *worse men* employ'd.

January hath XXXI Days.

Come mighty *Muse*! Assist me once agen,  
 Touch thou my *Cranium*, and inspire my Pen;  
 And let the *Black-mouth'd* Tribe again reflect,  
 Tho I don't *Prophecy*, I may *Predict*.  
 And that it may be with Truth and Good be blest.  
*Heaven* guide my hand, let mighty *Jove* assist.

It is now just a year since our Holy Plot was discovered, when *Passive Obedience* was turned into *Rebellious Resistance*, and a design laid to destroy the bravest Prince in the World, and this done by those who in their publick Auditories had be-rebell'd all mankind but their own faction; by those, I say, at whose Doors lies all the Blood and miseries of Ireland.

If we consider that the Ingress was attended with a ☉ of the ☉ and ♀, and a △ of ♄ and the ☉, those things compared with the beginning of this month, seems to shew us much news discoursed off among all People; and especially about Peace, and such Affairs as relate thereunto, as Truces, Cessations of Arms, and the like; and do you think there is any thing in it? *Vix Credo*

For ☉ and ♀ are Cadent, and the old plotting Knave is in ☉ to ☉, from the third and ninth, the house of Religion: I hope we have no more holy Plots coming abroad again, and yet I dare venture a Wager there is something in it, but it will be smothered in the Birth: he that plots for the Church plots safe.

The Councils of Europe very hush.

# February hath XXIX Days.

Of late, Heaven's *Coborts* did each other greet,  
 And at their *General Rendezvous* did meet.  
*Majors* in *Gemini*; there still resides,  
 While *Chronos* on his *Half-hors'd Bowman* rides.  
 Th' Effects lie snug and hush; and then begins,  
 When *Sol* and *Stalborn* do imbrace the *Twins*.

February, 1692.

When *Gadbury's Stars* and *Angels* did appear,  
The Fiends of *Rome* flew swiftly through the Air  
From some small *Cell* or *Cellar*, as 'tis thought,  
The *Reaking Babe* was in a hurry brought.  
Immortal *Elf*! how often that did dye,  
Its *Real Father* knows no more than I.

1							At the Ingress in <i>December</i> we find the ☽ void of course, but the ☉ is going to the △ of ♄, and on the Cusp of the Ascendant in ♄, but the ☉ lately separated from the ♀ of ♂, and the Body of ♀, and this so near the Tropick, that I fear will spoil the Influence of ♄'s <i>Balsamick Rays</i> , which indeed tend to peace.

March hath XXXI Days.

With full career, *Sol* to the *Ram* doth hie,  
 He being there, the Judge of Equity;  
 But ere he doth his *Regal Throne* possess,  
 Grim furlous *Mars* disturbs his happines.  
 Hence *Fouls* and *Differences*; hence too, Treach'ry flows,  
 Perfidious *Friends* are worse then open Foes.

Who dares call *Egby eight* an empty year,  
When things so plain in plenty did appear.  
It gave a *Prince* by *Miracles* begot,  
And *smooth* for *Priests* form foreign nations brought  
*Masi-houses* publick, did each City grace  
The *Regulators*; and a *Salisbury-Race*.

1			△		☐		At the Lunation now approaching, we find both ☉ and ♀ in exact square to ♂ from ♄ and ♀. <i>Lites Rexa</i> , <i>Inter sectiones multas in multis Locis</i> . <i>Mars</i> is in a human Sign from whence we usually find Quarrels and Contentions, as well publick as private, from whence also we shall hear of <i>Duels</i> and <i>Murders</i> about this time in divers parts: also <i>Skirmishing</i> by Parties of those Soldiers that guard the Frontiers of <i>Counties</i> and <i>Garrisons</i> . We may also expect to hear of some Cruelty, Murder, or other Villanies committed by the bloody <i>Repparce Papists</i> in <i>Ireland</i> . In most mankind in general are about this time inclin'd to Violence and <i>Villanies</i> , <i>Robberies</i> , and <i>Blood</i> ; as besides this Lunation, the square of ♄ and ♀, and the square of the ☉ and ♂ shews.

Whatsoever the discourse is about a Peace at this time, will end in words and noise, and have no other effect for I can see no real ground to judge any such thing, and besides, the War hath not travelled its full journey yet.

Much lying news spread abroad to the abuse of the Credulous, and this about some considerable thing as they report. Clippers detected, an Eminent man be.

# April hath XXX Days.

The Orbs and Stars; how stedfastly they're hurl'd?  
 Those *Arks* where God hides Judgments for the World;  
 That shake its Pillars; yet themselves we find  
 Beyond the Rage of *Thunder*, *Storms*, and *Wind*.  
 And when th'Almighty, through these Trumpets calls  
 Poor tott'ring Man, he staggers, and he falls.

No, no, four *Crsticks*, we cannot deny,  
That *Honest Jack* hath learnt to *Cant* and *Lye*.

Born for his *Mother's Ease*, not *Consciences*.

May, 1692:

That Land's unhappy, and will e're be so,  
 That hath a Prince can neither stand nor go:  
 For he that's led by Priests, by Priests is sway'd,  
 And Priests by King and Laws must be obey'd.  
 'Twas from such Laws (that King resolv'd to shine)  
 As Lewis gives, and not a Constantine.

Observations.

Some mighty Action near, of the nature of ♂; that is, fighting either by Sea or Land, notwithstanding the ☉ is in ♂ with ♀ and \* to ♂, and ♀ in \* to ♂ likewise. And I really judge the Arms of the victorious King of England is about this time successful against the Christian Turk, he I mean that scorns to be just or honest, the French Tyrant; and I judge also, there is a probability of the Effusion of much Blood, as well as a prospect of a Victory.

These Rays do also shew many Men according to their Qualities shall receive various Favours and Marks, or Characters of Honour, either as Rewards for Service and Valour, or else to qualify them for publick Business.

On May 20, & 22, 1685, Dr. Oates was whipt; being tried by a Protestant Jury, and Protestant Judges, such as they were; and found guilty on Popish Evidence; he had 2256 Lashes with a Whip of six Thongs knotted, which amounts to 13536 Stripes: his Judges were Jeffries, Withins, Walcot and Holloway.

There is now an ♂ of ♀ and the ☉, this makes a great Man frown, &c. There is work for the Messengers abroad if they will but look out sharp, &c.

## Observations.

The Death of some old States-men, Officers or Persons eminent in dispensing the Government of Nations, seems to prepare and make way for the rising of others, for Removes and Preferments, &c. And where Armies are near there is great expectation of Action between them, but I do judg the greatest and more considerable part of such Motion and Action will be deferred till the end of this Month, or beginning of July, but still preparing and great expectation what will be the Event of it.

The Affairs of this Month seem to concern Spain in their Military and Martial Negotiations; France in every thing that relates to her Government and Quiet; Hungary and Dalmatia, &c. are affected with some Dissentions, either about settling their Government, or about some Points of Religion. London is also disturbed with some Divisions in her peculiar Government; uneasy murmuring Spirits are still trying their Tricks to destroy their own Quiet, and the Peace of all besides: Poor Men! they want a Hobby-horse; but the best on't is, they are Men of more Hope than Courage, &c. Is London healthy? *vix credo*. Some eminent Wedding ends the Month, or near it.

Most pleasant *News*, some *Abdication* near.

Altho the ♌ of ♊ and ♋ have a large share in the Actions and Affairs of this *Summer*, as the other Rays and Lunations have ; yet it is to be considered differently from them, they being both of a slower Motion and greater Bodies than the rest ; and always with their present Influx stamp a new face on the publick Affairs of the World, and at this time of *Europe* in particular, as a few Months hence will inform us ; for there are three Oppositions as well as there were three Conjunctions.

But at present all things tend to Violence and Blood, the real Effects of War and Confusion : *Pax queritur bello*, after a Storm comes a Calm. The □ of ♊ and ♌, and ♋ and ♌ from Humane Signs, shews great Effusion of Blood by fighting ; *quando cum hoste manus conferunt* ; they also give Thieves infesting the High-ways with Murder rather than the loss of their Prey ; some Mischiefs done by the *Tories* in *Ireland*, and I think they are divers of them rewarded with a Halter, their due desert.

This Month is attended throughout with much News and Intelligence. Some removes among the Clergy, &c. and : merry Couple much talk'd of.

Is London free from Traitors? is that Crew  
Still seeking that; some Years hath been their due?

At the Luration that begins this Month we find no Planet angular; and therefore do I judg no considerable thing that is really new can be expected at this time: and notwithstanding there are so many Aspects in the Month, yet it will follow the Fate and Effect of the *Revolutional Ingress* next preceding, and the ☿ of ♀ and ♃. The ☐ of ♀ and ♃ from ♀ and ♃, gives abundance of lying false News and Rumors, some about Sea-Affairs, Merchants, Merchandizing, and the like; and I dare be positive almost that there will be some notorious piece of Cheatery acted and brought about under the *Notion* and *Mask* of Religion.

The ☐ of the ☉ and ♀ creates abundance of Difference in *London*, Heats in their *Councils*, and it should be about something that relates to its Government, but it will be for the City's Advantage in the Conclusion, and I think for the Establishment of its future Peace. But I fear *London* and also some parts of the Nation besides, will find it to be a sickly Autumn, some new *Fevers, Collicks*, &c.

Toward the latter part of the Month we may expect to hear of some Action from beyond Sea, of a *Battel, Skirmish*, or such like Enterprize.

September hath XXX Days.

Hath *Europe's* Foes laid by their murdering *Laws*,  
And the grand Murderer disown'd his Cause?  
Do *Popish* Projects with their *Plots* decrease,  
And *Noah's Dove* bring in the Branch of Peace?  
Pray then inquire; ask if it can be;  
If *England's Monarch* says it, I agree.

September, 1692.

And lest *September* never be forgot,  
Nor *Modena*, nor yet the *bawdy Plot*;  
Nor yet *Dada*, who, as the *Story* tells,  
Lent her his hand, and with that *Aaron's Bells*.  
When *Babes* by *Miracles* are got, as said,  
Farewel the ancient way of *Shirts and Bed*.

The □ of the ☉ and ☿, and the ☉ and ♀ will in some measure influence *September* also, and yet I do not think it will give any considerable Action abroad either, as to the Wars, by Sea or Land, or to the state of Affairs and Councils of *Europe*, and yet it seems to shew Difference and Quarrels, but they will be in and among private Companies and Societies which may prove the Cause of Duels, Murders, &c. The □ of ☿ and ♂ as they are qualified at the last *New Moon*, shews the Death of some Eminent Lady, and the Misfortunes and Troubles of others. If ♂ be in the seventh, as I do believe he is, in ☿ with ♀, and both Peregrine, he shews much Robbing and Mischiefs toward the end of the Month; and also the discovery of People that abuse the Coin of the Nation either by clipping, coining, washing, &c. Some cunning knavish Lawyer or Clerk catch'd in doing what he ought not to have done.

A brave bold Fellow, one of the Sons of ☿, receiveth Preferment as a Gratuity for his Bravery. *Mercury* having been twice in Δ to ♀ this Month, will give good News to the City of *London*, and I think it comes from some of our Western Plantations, &c.

# October hath XXXI Days.

There's mighty News abroad, 'tis come from far,  
 About some King's Affairs of Peace or War:  
 Jove's in the Twins: Methinks I hear the Voice  
 Of the curs'd *murmuring Crew*; the rest rejoice,  
*God save the King*, and he that wont say so,  
 Barton and Graham's Blessing with him go.

October, 1692.

October did this Land a King afford,  
A Prince [John says] that never broke his Word;  
Whose Courage, Wit and Conduct hath done more,  
Than all our great Reformers could before.  
His Reign was short; to Priests he owes his Fall;  
For Priests and Church he lost his Crown and All.

At the Ingress of the ☉ into ♈ we find a very peaceable Position; the Moon who is in ♈ to the place of the last ♈ in 1682, is in Δ to ♊, ♈ and ♋; Why should there not be Propositions made for Peace about this time, and that with success too? it seems very probable, and the Heavens themselves favour it: God grant it may succeed, if it is for the advantage of the true Protestant Religion, and the beating down of Tyranny, Popery and all Arbitrary Power. And indeed the Δ of the ☉ and ♊ doth mightily persuade me that there will be something done to the purpose in it in order to its Conclusion. And if it is now effected, the Illustrious and Valiant King of England will be the only Man to do it.

And besides, if we consider that ♋, the Coelestial Foot-post, hath been three times in Δ to ♊ within a few Weeks, and at the Ingress in Δ to the Moon in the fifth, the House of Embassies and Messengers, and Lord of the tenth, the House of Honour and Grandeur, it is the more probable.

The Month is generally spent in things of a private nature and quality, such as are the Affairs of States, Kingdoms, Nations, and Countries.

November hath XXX Days.

*Sol, Mars and Saturn in a fiery Sign,*  
[What e're their Project is] do there combine.  
Something they'll do, perhaps you'll wonder what;  
Why then I'll tell you, 'tis *some knavish Plot.*  
And something else too, will by them be done,  
They're all in *Quartile* to the *French King's Son.*

Season.

# November, 1692.

November, hang't, that plaguy Powder-Plot,  
Which John so often wilfully forgot.

In Eighty Eight too, how this good Man fails!  
He thought of nothing then but Prince of Wales.

The Babe being born, a Name you know's his due,  
A Name he had, A plaguy long one too.

## Observations.

The former part of this Month will give little or no Alterations in the publick Affairs and Business of Nations and Kingdoms till toward the end, and then there seems to be Projects and Projections to the purpose, and these attended too with something of Violence; for the Rays and Aspects are generally not only from violent parts of Heaven, but from humane Signs also.

About the middle of the Month the ☉ comes to the ♂ of ♈, near that eminent fixed Star called the *Scorpion's Heart*, which will spend its Influence two ways; 1. In the *Elemental World*: 2. In the *Intellectual*. 1. It will give strange and untoward Weather, Coruscations in the Air, and I judg Thunder in divers parts as well of this Nation as of others. 2. It gives villanous and treacherous Designs and Conspiracies against the Powers and Government of England in particular. Here is some cursed piece of Roguery at the door, but I judg it will be discovered; and the best way to prevent any more Plots, is to hang all you catch, by what Name or Title soever dignified or distinguished. But this Month will but give a beginning to these Affairs; and therefore you must expect its further Management and Prosecution in the next.

December hath XXXI Days:

*Motion and Time, those Twins, older than Man;  
When the dark Chaos alter'd, they began.  
They lurk'd throughout the whole; but to appear,  
God spoke them into being, and they were.  
These are the two that work, tho diff'rent ways;  
And as they do begin, conclude our Days.*

And bid Friend *John* his next Year's Manners mend:  
He who by *Hoens Poethi*, *Priests* and *Tricks*,  
Foretold a *Prince of Wales* in *Eighty six*:  
A likely story! for he could not say  
When all his *Makers* were to run away.

Observations.

Strange Weather ended the last and also begins this, and 'tis such as is not usual. 'Tis ten to one but there may be a fine stroke of business at the *Old-Bail* this Sessions.

The last Lunation is perhaps as remarkable a one as will happen again in many Years; for here we find it falls upon an ♂ of ♄ and ♀, and ♄, ♂, the ☉ and Moon all in ♂ in ♄ and ♀ near the Stars of *Orion* in ♂ to them all, he above the Earth in the tenth in Reception with ♄, and they all under the Earth peregrine: in a word, it shews Violence and violent Deaths: Let the rebellious Party take it among'em.

If a Man should but ask you; how gravely you'd tell me

Of Passive Obedience, yet catch'd in Rebellion:

If Rebellion's a Sin, ye are dipp'd and a sinking,

You Squires o'th' Halter, that hang Men for thinking.

If St. Paul had been here, and by you had been try'd,

(No Benefit of Clergy) he'd certainly dy'd.

God save King William and Queen Mary, and confound their Enemies.

The grand Balsamick Pill, so highly approved and effectually experienced for the Cure of all Aches, Swimmings, Pains and other Distempers in the Head, Shortness of Breath, Hoarseness, and other Distempers of the Lungs; as also for the Cure of the Cholicke, Dropsie, Scurvy, and Gout, is only faithfully prepared and sold by *John Hooker*, at his House in *Paul's-Chain* near *Doctors-Commons*; six Pills for 8 d. or nine for 1 s. in Tin Boxes sealed.

*William Boys*, that famous English Operator in Glass, that lately lived in *Bell-savage Yard* on *Ludgate-Hill*, is removed to the Golden Griffin in *St. John's Lane* near *Clarckenwell*, where he makes all sorts of Artificial Eyes, exactly like the Natural, having the very Motion too; and so exact, that they have been worn by several Persons many Years, and not known to the nearest Relations, as hundreds of this Nation can testify.

Those Incomparable Diaphoretick and Diuretick Pills, called *Matthew's Pills*, working by Sweat and Urine, are faithfully prepared according to the first Author, *Dr. Starkey*, and are to be sold at the first House on the Right hand in *Gun-Tard* in *Hounds-ditch* without *Aldgate*, *London*.

All *Glauber's Works* [containing variety of Secrets in Physick and Chymistry; sundry ways of improving Metallick Oars, working in Mines, separating Metals, making Salt-Peter, enriching barren Land, and improving the Fruits of the Earth] are translated out of Latin and High-Dutch by *Christopher Pack*, Chymist, and are to be sold at his House in *Little More-fields*; price in Quires 20 s. And there may also be had all sorts of Chymical Preparations, truly prepared; of which Catalogues are given gratis.

*John Russell* Physician, his Spirit of Scurvy-Grass both plain and purging; is the strongest most piercing and powerful Elixir of Scurvy-Grass that is now sold; those that buy it may taste it, and if it is not so, may return it without loss; being fit for the Closet of any Physician, and admirable in the Scurvy, Dropsy, Gout, and most other Diseases. Also his Lozenges for Coughs, Colds and Consumptions; with his Powder that kills all sorts of Worms. Sold at his House at the two blew Posts against *Greys-Inn* in *Holborn*, and in most great Market-Towns. Each sold for one Shilling.

## A general Judgment on the four Quarters of the Year MDCXCH.

**I** Shall in the first place look back to the *Sun's* Ingress into *Capricorn*, and to the new Moon preceding that which was the ninth of *December*, three days before the Ingress, that being on the 11th day of *December* at six minutes after one of the Clock Afternoon, 15 deg. of  $\nu$  being then on the Cusp of the tenth, and 6 deg. of  $\delta$  ascending. In the figure we find the *Moon* in the tenth house in  $\nu$ , and the *Sun* in the ninth house in  $\Delta$  to  $\nu$  in the Ascendent;  $\delta$  is Retrograde going by that motion to the  $\delta$  of  $\eta$ , but does not reach a partile  $\delta$  by 3 deg. on or about the sixth day of *January* following, and then is  $\delta$  stationary in 11 deg. of  $\Pi$ ; and tho they do not make a compleat  $\delta$  by the right Ascension, yet their Latitude considered in the oblique Ascension when  $\delta$  is in the oriental part of Heaven, especially in the Ascendent, they are in a perfect  $\delta$  for several days together both before and after; and upon this Position of the two Maleficks  $\eta$  and  $\delta$ , and the  $\Delta$  of the  $\odot$  and  $\nu$  with their Influence, will the Actions and Affairs of this Winter-quarter depend, and be stamp'd with their power and nature.

First then, Let us consider the  $\odot$  in  $\Delta$  to  $\nu$ , because that doth first of all take place, the  $\odot$  wanting but 4 deg. of the perfect Aspect. Of such a Position *Haly* tells us a Story about *Law* and *Wisdom*, and that they shall be more apparent and manifest at this time than at others, and that the Professors of those things shall be in greater Esteem than usual. But I am of opinion it will give either a meeting of some Eminent Men to consult on Matters relating to the publick Affairs of Nations, as they concern things of War, Safety, Confederacy, &c. or else (and what is more probable) it will give some ground and motion for Peace; being moved and prosecuted by some eminent Prince or King, signified by the  $\odot$  in  $\nu$  in  $\delta$  with  $q$ : I will not say it is positively with the *Turks* and *Emperor*, because it seems already in hand, but I do say it will concern some of their Affairs, and also other Dominions of those Eastern Parts, either in order to Peace, or the Settlement of their Governments; it also concerns *Ireland* and *Lorrain*, and I hope to the advantage of them both, in the settling the Government of the one, ruined by the late Devastation of the *Tories* and *Papists*, &c. and in rescuing the

*Judicium Astrologicum pro Anno 1692.*

other from the base and inhuman Tyranny of that *French Monster*, an Enemy to all Truth in Religion, keeping of Oaths, Leagues, and all things else that concern the Good and Safety of Mankind, and hath given a full proof of the *Vertues* of *Scorpio*, that *Judas* among the twelve. And indeed those two Countries are much befriended by the Position of  $\Psi$  in  $\gamma$ , and  $\varrho$  casting her  $\Delta$  thither to him, and the *Moon* also beholding their *Horoscope*.

The next thing to consider is the  $\delta$  of  $h$  and  $\zeta$  from  $\Pi$  and  $\uparrow$ , and divers are the Effects that will attend it. *Bonatus* says, that such a Position signifies many *Evils*, *Contentions* and *Quarrels*, *Mala*, *Rixe*, *Injurie*, atq; *Contentiones*. But the truth of all is, to lay by the Opinions of those in particular, and speak my own; I judg it will give in all places and parts *Mischief*, but of different Qualities and Effects; in the general Affairs of *Europe*, especially in those that relate to Peace, it will give *Obstructions*, *Hinderances*, *Objections*, &c. In *France* it will give want of Success, Poverty and Distraction, with Incur-sions into their Territories. In *Germany* it will give variety of Effects, as Inroads into some parts, Difference in their Councils, and such like: In *Ireland* the *Tories* will commit *Robberies* and *Murders*, and be fairly hang'd for it. In *Scotland* there may be some small disgust among the *Highland-Claus*, but the Season forbids any thing of Mischief to the purpose. And at home in *England* it will set the pious *Jacobite Crew* to plotting again, of which you may hear more particularly in or about the end of *February*: and there is some reason why it should shew its Effects in *England* more especially, because of the parts of Heaven where the Aspect is made from; and those are  $\Pi$  the Ascendent of *London*, and  $\uparrow$  the opposite Sign. But to say all in a word or two, the Quarter is like to prove quiet and close, the Season being now more for Council than Action: And so I come to consider the Spring Quarter, or the *Sun's* entrance into *Aries*.

**T**He Spring Quarter begins when the *Sun* enters the first scruple of the Sign *Aries*, and that is this Year 1692, *March* the 9th, at three minutes after three of the Clock Afternoon, at which time the 18th deg. of  $\gamma$  culminates, and the 29th deg. of  $\alpha$  ascends. In the Scheme we find the  $\odot$  in  $\square$  to  $\zeta$  hardly separated, and going to the  $\Delta$  of  $h$ , who is just turn'd Retrograde at the  $\odot$ 's entrance into  $\gamma$ .  $\Psi$  is on the Cusp of the Mid-heaven in  $\ast$  to  $\gamma$ , and the *Sun* and *Moon* the one just past, and the

*Judicium Astrologicum pro Anno 1662.*

the other applying to the Mundane Parallel of ♄, and of the seven we find but three angular, and they are ♄, ♀ and ☿; and thus stands the figure in the general.

The first thing to be considered, is the *Sun* just past the *Parallel*, and now in exact square to ♄, and this from *Equinoctial* and *Tropical Signs* ♀ and ♄ just entering, but the real Aspect was indeed from ♄ and ♀. This shews that there have been during the Winter-quarter divers Councils and Resolutions now to be put into Practice and Execution, and it is of such things as relate to the Wars, and are of the nature of ♄ and the ☉, *Violent, Popular and National*. And as the ☉ is in the eighth House, so it threatens the Death of Great and Noble Men on both sides, and also of the poor and ignoble, signified by the Parallel of the Moon and ♄ applying: And Bonatus says, that the *Sun* in the eighth House, significat depressionem Divitum & Magnatum seu Nobilium atq; Potentium, eorumq; diminutionem & mortem ac Improperium; and it doth not only shew the Destruction of great Men, but that they shall become a by-word or a scandalous Nickname, *Improperium*; who these are that are thus like to be made the Scorn of Fate, a little time will shew: and to add to this Aspect of the ☉ and ♄, we find the latter of them in the *Oriental* part of Heaven, and the *Sun* in the *Occidental* part. Thus, and with these kind of Actions doth the Spring-quarter seem to enter, and all are preparing to be ready betimes, as if Nature had design'd Destruction not to come soon enough. And give me leave to say this, there is a King in Europe, and I have seen him too, who hath this Year not only an extraordinary good and fortunate Primary Direction, but also a most admirable Revolution and Secondary Directions that do all exactly concur; and the Figure of this Ingress of the Sun seems to smile upon them all. May the Blessing of Heaven attend his Endeavours, till he hath compleatly pull'd down *Toryism, Tyranny and Popery*, and ever after bleis his Life with Peace and Glory.

But if we consider the ☉ is applying to the Δ of ♄ in ♄, and ♄ to the \* of ♀ on the Cusp of the tenth; such Rays do usually procure either Endeavours for Peace, or else strong Reports thereof; but I cannot from the Face of this Figure judg that any such thing can be effected and brought to pass at this time, tho I judg there may be some such thing moved, either to gain time, or to accomplish some other treacherous and perfidious Design; but the order of Nature I do really think

*Judicium Astrologicum pro Anno 1692.*

think is not yet disposed for a general Peace, tho I am of Opinion that the *Confusions* of *Europe* are nearly at an end, or at least ways drawing toward it;

*Mars* just leaving the Sign *Gemini*, and going into *Cancer* direct and increasing in motion, shews methinks as if those Armies who are now ready to take the Field are designed to attempt some new *Stratagem*, or else to transfer the *Violence* and *Devastation* of the *War* into some other *Nation*, *Kingdom* or *Country*; for the *Armies* seem to be early at work this Spring, and as they are early out, so they will immediately fall to some considerable Action both by *Sea* and *Land*; and I do really think this Year will give strange Changes in the publick Affairs of *Europe*, either in pulling down or setting up *Principalities* and *Powers*, perhaps both. And seeing I have said so much, and also I spoke before of the good Influences a certain King in *Europe* is now under, pray give me also leave to recite one Paragraph out of Mr. *W. Lilly's Monarchy and no Monarchy*, pag. 62, printed in the Year 1651: "Were I intended (says he) to weary my self in relating the woful Calamity which shall in less than half a Century of Years befall the *French Nation*, I might write a large Volume thereof, and tell them a certain Prince, as religious as a *Turk*, shall over-spread that Peoples most fruitful Territories, and all these Wars and Desolations will be occasioned by the unruly *Nobility*, who by their Civil Dissentions shall occasion the Ruin of the *French Monarchy*; and if you would know near the time when this great Mutation shall be, it shall happen when a certain King called *Henry*, is twice made King, and a Duke of *Florence* turn'd Protestant. And at this time there is no King in *Europe* of that Name, but the Valiant and Illustrious King of *England*. *Willem Hendrick Prins van Oranien nu Koningh van Engeland*, Ende Ik hope dat hy sal Koning van *Oranckrick* ook worden. And in the next Page after that before mentioned, Mr. *Lilly* says, "The King of *France* shall be driven out of his Country by his own Subjects: for he shall exercise great Tyranny against his Subjects, and the Church of *Christ*, being instigated and stirred up thereto by the Bishops and Priests of *Rome*, who shall seduce him and betray him traiterously with Bribery of Mony: But those Misdemeanours he doth, shall seem to be done in favour of his Kinsmen or Allies. But when he shall be removed, and like a false Man, forsaken and left alone in Exile, even by those in whom he confided.

"These

## Judicium Astrologicum pro Anno 1692.

These things shall come to pass in the end of his second Ingress to the Kingdom.

But to conclude my Judgment on the Spring-quarter, I will only mention one thing more of the ☐ of the ☉ and ☿, which I judg will follow it as an Effect, and that is some Epidemical Evil, such as is signified by the ☐ of the ☉ and ☿ from ♄ and ♀, and ♀ and ♄; for in all these Signs those two Stars complex that Ray, and also from those Principles which will be afterward produced, into the form of some Disease or Sickness; and this also seems confirm'd, because ♄ Lord of the Ascendent is going to the ☐ of ♀ in ♄, and the Moon just past his Mundane Parallel; and as we find ☿ in the Sign ♀, and having passed the ☐ of ♀, being stationary there also at the same time the Aspect was nearest; and ♀ remaining in ♄ all this Year, which is opposite to ♀ the Ascendent of London; so we may justly conclude that these Rays will annoy the City of London with some sort of Sickness, I think an untoward Fever about May or July; and also some Roguery about those two Months, and August and December by the Catholick Protestant Plotters, alias the King's Loyal Enemies. And so I come to consider the Summer-Quarter beginning June the tenth.

**T**he Summer-Quarter begins when the Sun touches the first script of ♄, and that is this Year on the tenth of June, at almost 18 minutes past four of the Clock in the Afternoon per Tab. Carolin. in the Meridian of London, 1692, at which time we have the middle of ♄ ascending, and 2 deg. of ♄ on the Cusp of the tenth House, the Moon in the tenth in ♄. ♀ is in ♄ in the Ascendent, and ♄ is in ♀ in the seventh, all three angular, and the two last in ☐ from violent parts of Heaven; the Moon is separated from the ☐ of ♄, and is going to the ☐ of the ☉ in ♄; and to add one Position more to the rest, we find ☿ and ♄ in ☌ in ♄ with that regal fixed Star, the Lion's Heart.

At the Preventional New Moon all the Planets are either in cadent or succedent Houses, but above the Earth, except ♀ who is in the second; and at the Ingress we also find them in the same Position and the same Horoscope, only ♄ is nearer to the ☐ of ♀. This Aspect falls in the sixth degree of ♄ and ♀, ♄ with that eminent fixed Star called Aldebaran, or the Bull's Eye, and ♀ with that Star called the Scorpion's Heart, both

*Judicium Astrologicum pro Anno 1692.*

both of the first Magnitude, and will add much to the power and force of their Influence both in Rigor and Violence. Our Authors all agree that it creates and gives Difference, Quarrels, Contentions and Wars; to which purpose *Haly* says, *Significat quod vix erunt multe & placita inter homines & gentes; unus animabitur contra alteram, vel inter alios homines qui sunt inferioris gradus quam Reges; etiam significat nubes multas.* It signifies (says he) that there shall be much Strife, Contention, and Difference between Men and Nations, one shall be animated against the other; and this shall be among Men of a Quality beneath Kings; it also signifies much cloudy Weather. *Contentiones bellorum ex ipsius Regionibus, in quibus Saturnus & Jupiter fuerint:* There shall be Wars and Difference in and between those Countries, People, and Princes that are under those Signs in which  $\hbar$  and  $\psi$  shall be: And if these are like to be the Effects of this and these Oppositions, then we must allow that their being with those fixed Stars must add much Violence, Fury and Celerity to their Effects, and this even to the Expence of much Blood, because it is made from Humane Signs; and the most considerable places subject to these Signs are, *Flanders, Brabant, London, Bruges, Spain, Hungary, Moravia, Dalmatia, Buda, Cologne, Louvain and Mentz;* and in these Countries and Cities will the force of their present Influence be felt; and indeed 'tis the Influence of this Opposition that will affect all the Actions and Affairs in *Europe* for the two following Quarters.

We also find the Moon in  $\square$  to  $\odot$  from the tenth and eighth Houses, this gives much lying News, Abuses to the Government, you may easily know from whom, the honest true blew Protestants; the Moon is on the French Tyrant's Sun, and for that reason I judge it will affect him in particular, and for the generality of its Effects they will be much of the nature of those above spoken of about the  $\odot$  of  $\hbar$  and  $\psi$ ; for it is a Square and falls in humane Signs. But before I conclude my Judgment of this Quarter, let us but observe this one Position of  $\odot$  and  $\odot$  on the place of the last Conjunction in 1682 in *Leo*, they are in  $\ast$  to the little foot post *Mexury* who doth indeed make a double Sextile to them, and goes immediately to the  $\ast$  of  $\psi$  and  $\Delta$  of  $\hbar$ ; this seems to shew some new Undertakers and Projects for Peace, and this managed with a great deal of Industry and Diligence, but I fear to small purpose in the Conclusion.

Seeing

*Judicium Astrologicum pro Anno 1692.*

Seeing most of the Ancients have in their Directions for their Annual Judgments given Orders and Directions to chuse and elect the Lord of the Year, and from thence draw a great part of the Judgment in general: I say, seeing they have done so, and that I have and do always neglect it, this is to inform every one concern'd, that I look on the Lord of the Year to be like their *Alchocodens, Chronocrators, Alfridaries, Almutens* of a Figure or *Nativity*, &c. which were indeed nothing else but *Arabian Whims*, as was their *pitted* and *smoaky degrees*, which *J. G.* says causeth stinking Breaths; but whosoever is inclined to use them or any of them, may do it without any success or hopes of it.

THE Autumnal-Quarter begins the 13th of September, when the Sun toucheth the first scruples of *Libra*, and that is this Year 1692, at 53 min. after five of the Clock Afternoon, at which time 28 deg. of  $\Pi$  culminates, and 28 deg. of  $\Upsilon$  ascends in the East. I shall have no reason to insist on a long Judgment upon this Figure and Quarter. The Positions are general and follow the Fate of the former part of the Year, there being nothing remarkable in this Figure but  $\varphi$  making two *Trines* with  $\psi$ , and also two *Conjunctions* with  $\zeta$ , and a  $\Delta$  of  $\zeta$  and  $\psi$ , with the Moon in  $\Delta$  to them all in  $\infty$ : and in the Effects of these Aspects I am of a quite different Opinion from *Haly*, who doth allow them a violent Effect; but I do judg that they will to the utmost of their force press after a good one; for if we observe, they all behold the place and plices of the last great Conjunctions, and that there are two of the Superiors and one of the Inferiors concern'd in the Aspects, so that it is rational to judg that the Effects of these Positions will be for Peace and Pacification, and that both the *Statesmen* and *Commonalty* in all Nations seem inclin'd and willing to its Conclusion, as being weary of the War and Devastations.

And besides what hath been said before, we may observe the Houses where the Planets are placed, and they are the first, fifth and ninth, which are parts of Heaven that are also proper and natural for such an Affair, the fifth being the House of *Ambassadors, Embassies* and *Messengers*, and the ninth the House of *Sea-voyages* and *Journies*, all which are useful and subservient to the Work before mentioned. In a word, the Spring-quarter will begin and hold with a kind of Fury. The Summer-quarter

quarter will shew the Effects of the former, and continue the Effects thereof; but this of Autumn will afford no new matter either for Discourse or Action, what is will be toward *Christmas*: And so I conclude my Judgment on the four Quarters of the Year.

*Of the Eclipses in this Year 1692.*

**T**Here will happen five Eclipses this Year, three of the greater Luminary the Sun, and two of the lesser Luminary the Moon, and but three of them visible in our Hemisphere if the Air be clear, but none remarkable but that in July.

The first is of the Moon January 23, at two hours after Noon, and therefore invisible.

The second is of the Sun the seventh of February in the Morning at four of the Clock, therefore not to be seen by us.

The third is of the Moon the 18th of July about three in the Morning, and may be seen at London and other parts of England if the Air be clear, it is in almost 6 deg. of  $\infty$ , and begins at almost half an hour past One; the middle of it, or the greatest Obscuration, is at Three of the Clock, and the end of it, or the full Recovery of the Moon's Light at almost three quarters past four: The middle of the Eclipse falls on the Cusp of the eighth House, and  $\eta$  is Governour of the Eclipse, and the Angle preceding it, but in  $\Delta$  to the Sun and  $\ast$  to the Moon. It is the Opinion both of *Messahale* and *Ptolomy*, that an Eclipse as this is, threatens Destruction to all sorts of fresh and River Fish, and that after the Eclipse, they will be more scarce and hard to be got: But *Cardan* says that an Eclipse happening as this doth, at the entrance of Harvest, threatens ill Weather to the laborious Country-man; but considering the  $\Delta$  of  $\eta$  and the  $\odot$  from the second and fifth Houses, I am of the opinion it will be the less hurtful.

The fourth Eclipse is of the Sun on August the second, at near ten in the Morning; this Eclipse is omitted by *Argol*, but inserted by *Mezzavachis*, it falls in our Meridian, but I think hardly to be seen, and it will be but a small one.

The fifth Eclipse is of the Sun also, on the 27th day of December, at Two of the Clock in the Afternoon, it will be but a small one, and hardly to be observed, however let the curious

their Skill. But before I conclude, I have one word to leave  
with my Country-men.

And that is, to advise all that are not willing to be French  
Slaves and Papists, to consider the base Designs of some of all  
Qualities among us, that use their utmost Endeavors to bring  
him back again that was the cause of all our late Ruins and  
Murders, and did his Endeavour to bring in Popery bare-  
faced; I say, consider of it, and look upon all those to be  
the Betrayers of you to a French Power, who talk against  
the Government, and cannot take the Oaths, but plot and lie  
to the purpose.

God save the King, that King that sav'd the Land,  
When James, your Martyr's Son, your Laws had sham'd.  
That sav'd your Babes, your Lands, Estates and Wives,  
And your own Throats too from dispencing Knives.  
When bloody Priests did expedite your Doom,  
And Castlemain in State was sent to Rome.  
When plotting Ely felt his Master's hate,  
And sawcy Pen and Peters rul'd the State:  
'Twas then he sav'd us from those Beasts of Prey,  
Then was the time, and that without delay.  
He spar'd no Toll, no Danger did he dread,  
He came and saw his Foes with Terror fled:  
That Prince who never run, can boldly fight,  
Deserves a Crown, he dares defend his Right.  
Lord! let his Foes be wrapt in slavish Fears,  
And Storms of Terror rattle in their Ears;  
Confound their Plots and Projects that they do,  
And if need be confound their Persons too.  
But let his Days be long, his Fame increase,  
Add to his Conduct many Victories,  
Lord, keep him safe, first in his Subjects Love,  
And to his Crown below, add one above.  
Heaven bless his Arms, preserve him in his own,  
And God and Angels guard his Tent and Throne.
